

police officers to stop citizens engaged in law-abiding activities and demand that they produce proof of identify and `give a good account of themselves.' There would be no excuse for not carrying the card--only criminals would not be carrying the card," Smith agrees.

Senator Dianne Feinstein: "I'm Handgun Control International"

§ United States Senator (D-CA)
§ Elitist Hypocrite
§ Irresponsible and Unsafe Firearm Owner

This affluent, wealthy, and influential member of the "liberal" elite says that people should not be allowed to own handguns, but she has permit to carry a handgun in

California.What she obviously means is that the little people- people who are not wealthy and influential Senators like herself- should not have the right to protect themselves from violent crime.

This individual does not think that ordinary citizens can be trusted with guns- but she showed in public that she is the one who needs basic lessons in safe and responsible firearm handling. According to columnist Jill Labbe's column, "Guns nowhere as dangerous as liberals who can't handle them":

"There stood Dianne Feinstein, the anti-gun senator from California, posing for all the nation's media to capture on Kodachrome, holding an AK-47 with her finger firmly planted on the trigger."

"Here's a woman so concerned about the supposed recklessness of gun manufacturers that she's calling for a ban on high-capacity ammunition magazines- the justification being little more than anecdotal evidence- who wouldn't know firearm safety if it bit her on the end of her upturned San Franciscan nose."

Labbe rightly points out Ms. Feinstein's violation of the rules of safe firearm handling. Any military person or police officer (along with millions of responsible civilian firearm owners- the people Ms. Feinstein, who has shown herself to be an irresponsible firearm owner, wants to disarm), will tell you, "Never put your finger inside the trigger guard unless you want to fire the weapon."

Labbe also points out that the AK-47's muzzle was probably pointed at one or more of the people in the crowd around Senator Feinstein. The gun was, of course, probably unloaded- but again, those responsible firearm owners and users, of whom Feinstein is obviously not a member, will tell you, "Always treat a gun as if it's loaded. Always. Never point a gun at anyone or anything you wouldn't want to shoot. Never." After all, very few people are accidentally shot with guns the handler believes is loaded.

Senator Dianne Feinstein:

"I'm Handgun Control International"

Handgun Control International symbolizes domestic and international efforts (e.g. United Nations) to restrict firearm ownership by law-abiding American citizens. It is not affiliated with Handgun Control Inc., although their agendas are very similar.
